AGRICULTURAL IMPLEMENT WHOLESALERS

DBM1250

Mixing concrete seems to be an on-going task for many jobs around farms and these portable mixers mean you can mix your specific loads when and where you want to. Not only concrete can be blended but a wide range of products such as grain mixes, stock-feed and even other forms of agents such as mud! The DBM model concrete mixer can be either lifted using the tractor hydraulics or with pallet forks. Optional hydraulic drive is available or PTO shaft drive is supplied standard.

**DBM1250
CONCRETE
MIXER**
