## TM150 SPECIFICATIONS

### INFORMATION

- Through its design, the TM150 can handle rocks and tree roots easily and efficiently.
- The TM150 is a vertical auger style trencher with tungsten carbide cutting teeth.
- Is best suited to tractors with either creeper gears or hydrostatic transmissions.
- Requires a tractor with at least 25hp.
- Powered through the tractor PTO via a standard driveshaft and gearbox.
- In softer soils, the TM150 is capable of creating a trench at speeds of around 16+ metres/minute.
- In harder soils or soil with a lot of rock, speeds of around 5 metres/minute are achievable.

### TM150 SPECIFICATIONS

Max digging depth	800mm
Digging width	150mm
Tractor HP required	25HP (minimum)
Trenching speed (soft soil)	16+ metres/minute
Trenching speed (hard soil)	5 metres/minute
Weight	290kg
Width	930mm
Height	1400mm
Length	1450mm
